MARCH 2024 MONTHLY REPORT

The image above shows an Emerging Tusker coded as GO1. The Emerging Tuskers are impressive young bulls who given time and space, will become the next Super Tuskers of Tsavo. Tusker elephants are faced with persistent threats from poachers but also Trophy hunting, where in some places outside Kenya this is legal, all driven by the allure of their remarkable tusks. It is of utmost importance to ensure the perpetual protection of these magnificent creatures.

Aerial Reconnaissance and Ground Patrols - Areas Covered:

- Aerial patrolling is a vital conservation tool providing “**eyes in the skies**” and directional guidance to ground units who provide “**eyes and ears**” on the ground. The combination of both is effective.
- All aerial patrols and ground patrols are carried out jointly - KWS/TT and recorded with all relevant real-time observations relayed to KWS daily for rapid actions and for their records.

TSAVO TRUST'S AERIAL & GROUND PATROLS COVERAGE OVER TCA
March, 2024

*The map shows Tsavo Trust's flight paths in **RED** and ground patrol paths in **GREEN** over the TCA this month.*

***Note:** The Tsavo Parks are huge comprising 22,000km² (TENP, TWNP & CHNP) and then a further 20,000km² totaling 42,000km² to form the Tsavo Conservation Area (TCA).*

***Aerial:** 52 hours flown covering 7,792 kilometers over Tsavo in support of KWS.*

***Green:** 1,237 kilometers of foot patrol and a further 31,551 kilometers of vehicle patrol in Tsavo to support KWS.*

***Activities covered:** Air & ground security patrols; Big Tusker monitoring; Rhino related activities; Locating illegal activities; Wildlife monitoring; Aerial census & telemetry tracking & Community Conservancy aerial and ground activities.*

Photo below shows a herd of elephants drinking water from Mbololo Sand dam B. Tsavo Trust and its partners KWS, WRTI, Sand Dams Worldwide, and African Sand Dam Foundation have now constructed 13 sand dams in the Tsavo National Parks. This ensures better sustainable water distribution, especially during the dry seasons. Photo Credit: Tsavo Trust – Christine Mwende.

Field Mobile Units:

Tembo 1, 3, 5, 7, 9 teams, Kamungi & Shirango Scouts are habitat protection / de-snaring focused.

Tembo 2 (TENP) & 4 (TWNP) teams are wildlife monitoring dedicated.

Tembo 6, 8 & 10 (TWNP) teams are rhino specific with confidential info.

All teams work alongside KWS daily, providing further “eyes and ears in the field”.

Unusual Photo of the Month:

The photo above shows the Kamungi Conservancy chairman inspecting a maize harvest with a beneficiary of Climate Smart Agriculture program. This initiative, implemented by Tsavo Trust in collaboration with USAID and IFAW, aims to bolster food security in this arid region of Kamungi. Through comprehensive training sessions and planting of certified seeds, beneficiaries experienced a significant increase in their harvests during the last planting season. Veronicah Ndungwa, for instance, who previously struggled to produce any harvest, managed to yield 1,170kg of maize, 180kg of cowpeas, and 84kg of green grams.
